Hiring Manager
University of North Carolina
Carolina Population Center

Dear Hiring Manager:

I am applying for the Web Developer position at UNC's Carolina Population Center, which was brought to my attention by Indeed.

I completed the University of North Carolina Coding Boot Camp in August of this year. A couple of years prior to my experience at the bootcamp I experimented with developer boards and C++. Which provided a great platform to digest the curriculum set by UNC. I mainly have been writing in Javascript with React, and can utilize other frameworks and technologies for the proper applications. I am familiar with database/API management, specifically MySQL Workbench and MongoDB. Currently I am researching Agile project management along with UI and UX philosophies.

I also offer marketing experience from of a variety endeavors including PR internships at Seven Waves Corp and Carolina Sedan. Trends are not foreign to me, both in and out of the tech world. During my studies I ran a small marketing/production firm for creatives and small business owners called Trickle Media with a few other multimedia artists. I have had a more than sufficient understanding of Word Press, the Adobe Creative Suite, and other digital workstations for more than five years.

I have an interest in sociology as well as demography and would love the chance to talk with you more about this position. If you have any further questions please call me at 919-260-5009 or email me at salem.ezz@gmail.com.

Sincerely,

Salem Ezz
